Conditional Control

surveydown

Conditional Control

1. Conditional display

2. Conditional skip forward

Conditional Control

1. Conditional display

2. Conditional skip forward

Conditional Question Display

Conditional question display

Which is your favorite type of penguin?

○ Adélie

○ Chinstrap

○ Gentoo

○ Other

Next

survey.qmd

```r
# Conditional question
sd_question(
  type  = "mc",
  id    = "penguins",
  label = "Which is your favorite type of
penguin?",
  option = c(
    "Adélie"    = "adelie",
    "Chinstrap" = "chinstrap",
    "Gentoo"    = "gentoo",
    "Other"     = "other"
  )
)

# Target question
sd_question(
  type  = "text",
  id    = "penguins_other",
  label = "Please specify the other
penguin type:"
)
```

app.R

```r
server <- function(input, output, session)
{

  sd_show_if(
    input$penguins == "other" ~
"penguins_other"
  )

  # ...other server code...

}
```
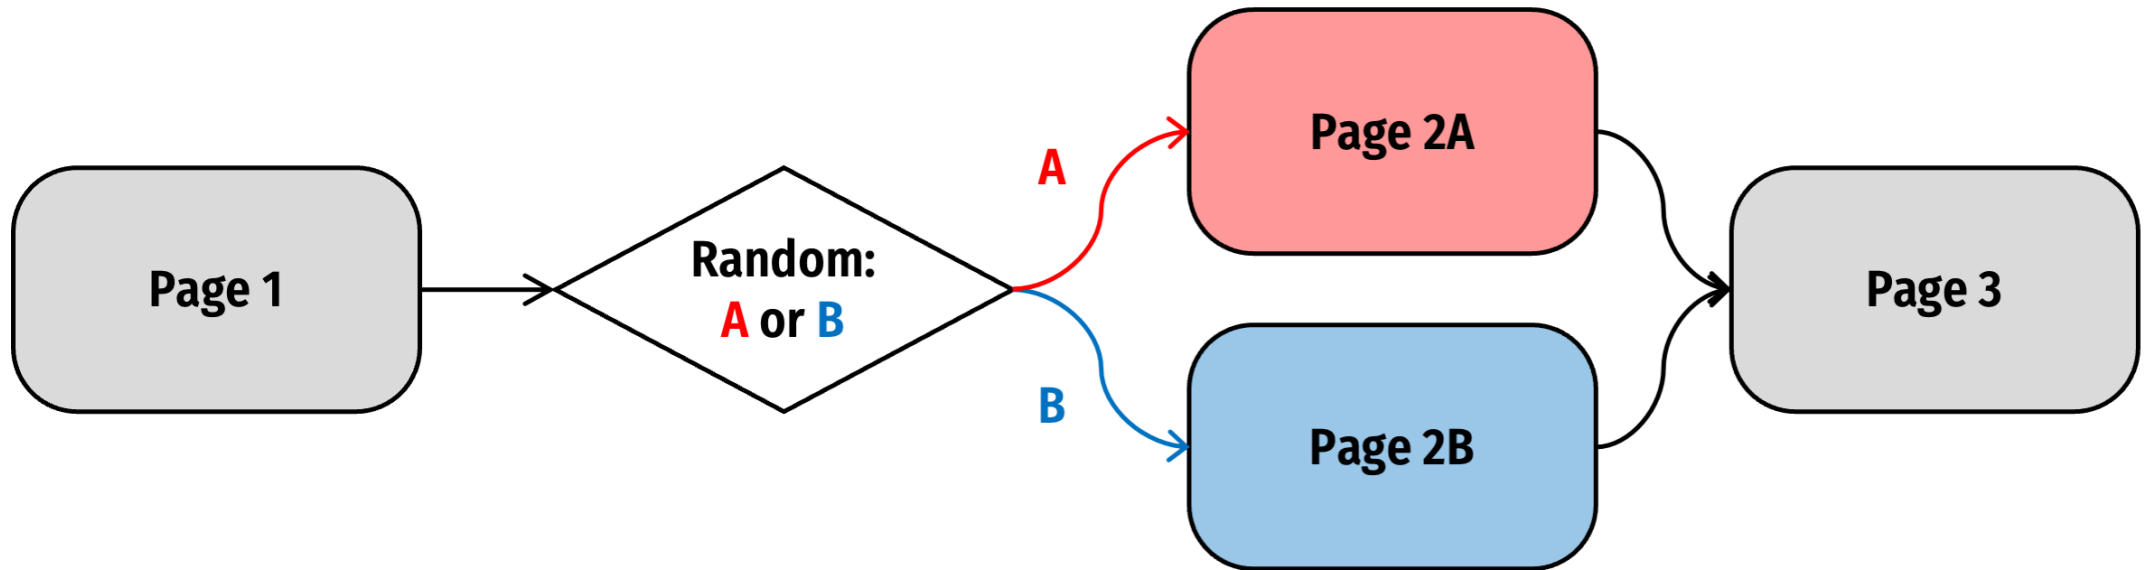

Condition ~ Target

"If {condition}, then show {target}"

Conditional Page Display

Example: Randomly display one of two page versions

survey.qmd

```
--- page1

This is page 1

```{r}
sd_next()
```

--- page2a

This is page 2A

```{r}
sd_next()
```

--- page2b

This is page 2B

```{r}
sd_next()
```

--- page3

This is page 3
```

app.R

```r
server <- function(input, output, session)
{

  # Generate random condition
  rand_val <- sample(c('A', 'B'), 1)

  # Store the condition value
  sd_store_value(rand_val)

  # Use sd_show_if to show target pages
  sd_show_if(
    rand_val == 'A' ~ 'page2a',
    rand_val == 'B' ~ 'page2b'
  )

  sd_server()

}
```

Conditional Control

1. Conditional display

2. Conditional skip forward

Example: **Participant screen out**

Example: **Participant screen out**

Do you own a vehicle?
- ( ) Yes
- ( ) No

Next

survey.qmd

```
--- page1

```{r}
sd_question(
  type  = 'mc',
  id    = 'vehicle_ownership',
  label = "Do you own a vehicle?",
  option = c(
    'Yes' = 'yes',
    'No'  = 'no'
  )
)
```

--- screenout

Sorry, but you are not qualified to take
our survey.
```

app.R

```
server <- function(input, output, session)
{

  sd_skip_if(
    input$vehicle_ownership == "no" ~
"screenout"
  )

  # ...other server code...

}
```

Condition ~ Target Page

"If {condition}, then skip to {target}"

For both conditional display and conditional skip forward, there are lots of conditions to choose from

Your turn

- Open the survey you were editing from your last practice.
- Add conditional logic content:
  - Add one simple multiple choice question about your survey topic and another that will only display depending on a specific choice in the first question.
  - Add a target page that respondents should be sent to based on their choices in another question in an earlier page (e.g., a multiple choice question).

OR:

Open and play with the examples:

- `part-2-conditional-display`
- `part-2-conditional-navigation`
